

ArcSoft® Embedded Solutions - Camera Suite

Advancements in technology have opened the doors to the world of digital imaging for even the most novice user. Digital cameras are no exception. Feature-hungry consumers are always on the lookout for cameras that offer the most commands and require the least amount of post-capture work. ArcSoft's embedded technologies give the phrase "point and shoot" a whole new meaning

www.arcsoft.com

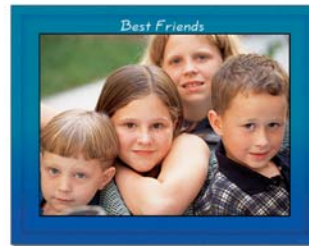

With a decade of experience in digital multimedia technologies, ArcSoft offers embedded firmware solutions specifically for digital cameras, allowing your device to perform operations once exclusive to the PC. Your customers will save time while their overall user experience is enhanced.

Automatic Panorama Stitching

Direct Connect Printing

Creative Content

Red-eye Removal

ArcSoft's embedded technologies add advanced features and usability to your digital camera.

FEATURES

AUTOMATIC PANORAMA CREATION

Customers can take a series of pictures and have your camera automatically stitch them together into a larger panoramic image in real-time. The camera itself assists the user through each snapshot to ensure perfect results.

DIRECT-CONNECT PRINTING

Time spent downloading pictures is no longer an issue. With ArcSoft, your camera can connect directly to a printer, without a computer.

CREATIVE CONTENT

Fun frames, borders, and other templates are offered to add a creative edge to your device. Your customers can insert their own personal photos into any available template. Everything is done right on your camera.

COLOR ENHANCING & EDITING

Give your customers the ability to remove red-eye in an instant. They can also rotate photos and alter image color on the spot. Automatic enhancing and fancy effects can be applied to any photo.

ArcSoft's high performance multimedia processing libraries are optimized for low-profile embedded systems and support images, video, and audio. They require minimal memory usage and CPU power.
