

**ArcSoft Funhouse** creates imaginatively funny and outrageous images by letting you combine photos of your friends and family with comedic and historic scenes and backgrounds. It makes it easy to turn yourself into an astronaut or put your face where it really belongs — on Mt. Rushmore! Best of all, it's incredibly easy to use and is designed to walk you through each simple step.

- Over 150 different scenes included
- Create your own templates and use your own photos
- Capture live shots directly into your project
- Print or email your finished work
- Do it all in 5 easy steps

#### **FUNNY AND HISTORIC SETTINGS**

Built-in scenes are organized into different categories so you can find exactly what you want. Be a sports star, movie poster celebrity or cartoon space hero. You can even scan in your own images and design your own scenes!

#### **PUT YOURSELF IN THE PICTURE**

It's easy to put your picture into any of the templates we've included. And it's just as simple using your own photos. Swap heads with your friends, put a family member's head on the dog — there really isn't a limit in terms of what you can do. You decide what areas of the scene get replaced by another photo.

#### **PERSONALIZE IT WITH SOME TEXT**

Including a snappy caption or title pretty much seals the deal. Not only do you end up with a cool picture; you also have a catchy quote to really set the tone of the image.

#### **MAKE MINOR ADJUSTMENTS**

Is the color between the blended images looking a little off? No problem! Various tools (including an automatic color matching button) help you create the perfect illusion. It's also really simple to resize and reposition inserted photos.

#### **PRINT IT, OR EMAIL IT**

When you're all set, you can print your Funhouse image or email it directly from the program. Since you can save in formats that are friendly for the Web, Macintosh and Windows systems, you can share your great creations with anyone.
