# ArcSoft photoPrinter® 5

The quick, easy way to get great-looking photo prints at home

If you're looking for do-it-yourself printing software that's really easy-to-use, works with the printer and paper you already own and can give you prints that look as good as anything you can get at your local photo lab, ArcSoft PhotoPrinter® 5 is the one for you. This latest version of our most popular program features a totally revamped user interface that makes at-home printing easier than ever for beginners and photo enthusiasts alike. What's more, the program comes packed with imaging 'extras' such as Auto Red-Eye Removal, Perfect Crop, Print from Video and a Color Profile Wizard that helps you produce flawless photo prints, every time.

- **User-Friendly** – the clean, simple user interface makes printing your pictures easier than ever.
- **High Quality Printing** – the Color Profile Wizard walks you through the process of optimizing your printer's color output settings.
- **Paper Friendly** – the impressive list of paper brands supported means you can shop for the best deals on media without worrying about compatibility.
- **Large Preview Area** – the huge project workspace gives you to get a clear, uncluttered view of your project before you begin printing.
- **Smart Engineering** – the automatic rotate and crop features greatly reduce the number of clicks needed to prepare photos for printing.
- **Video Frame Printing** – the unique Capture Stills from Video feature gives you the unique opportunity to turn video files into great-looking printed pictures.
- **Image Enhancement** – the built-in editing tools allow you to sidestep the complicated software you usually rely on for cropping, sharpening and fixing red-eye in your pictures.
- **Custom Layout Options** – the unique collage and index page printing features give you creative options not usually available in other print software.

## FEATURES

### USER FRIENDLY

ArcSoft PhotoPrinter® 5 features a large, expandable workspace, convenient drag-n-drop picture placement and exposed print driver controls, all of which make printing great-looking pictures easier than ever before.

### AUTOMATIC PRINT SETUP

Whether you're working with two pictures or two hundred, the program's automated crop and rotate features make printing multiple pictures amazingly quick and painless. ArcSoft PhotoPrinter® 5 automatically fits each photo into the best position for the paper you've selected – so all you need to do is click Print.

### SUPPORTS ALL PAPERS AND SIZES

ArcSoft PhotoPrinter® 5 supports all the top brands of specialty photo paper including Kodak, Avery, Epson, Canon, HP and even includes generic templates for US and international standard photo print sizes, unique print sizes, index printing and collage printing.

### MULTIPLE IMPORTING OPTIONS

Besides working with the pictures on your PC, ArcSoft PhotoPrinter® 5 enables you to import pictures directly from scanners, cameras, and multimedia cards. You can even capture stills from video.

### CAPTURE AND PRINT FROM VIDEO

Sometimes, life's best moments are missed by the camera but captured on the camcorder instead – touchdowns, weddings and baby's first steps come to mind. With ArcSoft PhotoPrinter® 5, you can print any video frame or video frame sequence in just a few clicks. Very cool!

### PHOTO EDITING MADE EASY

Conveniently, ArcSoft PhotoPrinter® 5 gives you a set of one-click tools for fixing the problems most common to digital photography including: red-eye, dark and blurry images and pictures that need to be cropped.

### CREATIVE TOOLS

ArcSoft PhotoPrinter® 5 features a collection of fun borders and color effects that you can apply to your pictures for one-of-a-kind results: old-fashioned photo corners, blurred edges, rounded corners and sepia effects to name a few.

### COLOR PROFILE WIZARD

So you always get the best quality prints possible, ArcSoft PhotoPrinter® 5 includes a Color Profile Wizard that helps you choose the best settings for your printer. After just a few clicks you can be sure your printer and your computer are optimized for color print perfection.
