

ArcSoft TotalMedia™ EXTREME

Your complete multimedia software suite for Home Entertainment

ArcSoft TotalMedia™ Extreme is a complete software solution for working with high definition multimedia content. It is a suite of applications that allows you to play video as well as create and edit video and music discs and photo slide shows and back up files - all using a combination of HD DVDs, Blu-ray discs (BDs), DVDs, or CDs. All our applications work together seamlessly, providing a fully integrated solution.

Elegant, fully integrated application suite
Easy to use yet feature rich

Leverages existing shipping and successful solutions
Modular and customizable

Fully Integrated Application Suite: 4 Products in 1

TotalMedia Extreme includes our high performance video playback software, our successful data archiving program, and two different video creation applications designed specifically for high definition technology - all in one elegant, seamlessly integrated solution. End users who don't have one of the newer optical drives yet can buy a DVD-only version of the software, then upgrade later. As an OEM customer, you can license the combination of products that best meets your business needs; end users can purchase the other products afterwards if they choose.

ArcSoft TotalMedia™ Theatre: A Truly Universal Player

Watch all your favorite movies, no matter what the format! TotalMedia Theatre supports seamless, high quality playback of all disc and file formats. In addition to being able to play commercial and homemade DVD movies, TotalMedia Theatre can also play Blu-ray discs, HD DVDs, CDs, VCDs, and a variety of multimedia files, including QuickTime, RealPlayer, DVR-MS, WMV HD, and H.264 HD videos. As part of TotalMedia Theatre's support for Windows Vista™, you can watch your movies with Windows Media Center (including Vista Media Center Edition) or Windows Media Player. TotalMedia Theatre can automatically launch into full screen mode, controlled by your remote control.

TotalMedia Theatre fully supports the HD DVD and Blu-ray specifications, so you can play the latest Hollywood movies, plus take advantage of interactive content like game play and internet connectivity through the new HDi and BD-Java technologies.

ArcSoft TotalMedia™ Studio: Video Capture, Create, and Edit with Scene Selections

The ArcSoft TotalMedia™ Studio application is designed for creating amazing, customized high definition content - like photo slide shows or home movies - complete with menus, chapters, and scene selections. Capture or insert video, create time-based or browsable slide shows, then perform some on-disc editing. Easily design and create scene selection menus and buttons. Finally, create either Blu-ray (BD-MV) discs or traditional DVDs. Simply follow the steps along the top of the screen, and you'll be burning and sharing your own high definition content in no time!

System Requirements

- Windows XP SP2/Vista
- Pentium EE 3.2 GHz or equivalent, Intel Core Duo or equivalent
- 120 MB free hard disk space
- 512 MB RAM (1 GB recommended)

ArcSoft TotalMedia™ VR: Video Capture, Create, and Edit with Playlists

The ArcSoft TotalMedia™ VR application is designed for creating, editing, and archiving personal video content or recorded TV shows by creating playlists of your videos and photos! TotalMedia Studio AV lets you create, edit, and archive popular video, photo, and music formats, including video transferred directly from your camcorder or your HDTV tuner. Real-time on-disc editing and the ability to create real and virtual playlists make creating a personalized project fun and easy. Burn your project to a Blu-ray disc in BD-AV format.

ArcSoft TotalMedia™ Backup & ArcSoft TotalMedia™ Record: Backups and Data Mastering

Whether your most important files are audio, video, email messages, or Internet Explorer favorites, these two applications let you easily back up and restore everything you can think of. Simply click one button to select all your irreplaceable files, then click once more to back them up to CD, DVD, or BD. You can also create or rip audio CDs and create and copy disc images. It's a complete data mastering solution!

TotalMedia Backup and TotalMedia Record are also where you can create audio CDs to play in your car or from your home stereo system. You can rip your audio CDs to hard disc in a variety of formats, and you can copy CDs easily. Both music and data discs are easy to create or duplicate, whether you prefer CD, DVD, or BD format.

For Blu-ray and HD DVD playback

- Blu-ray or HD DVD drive
- NVIDIA GeForce 8400 and above, or AMD (ATI) HD2400 and above
- 256 MB graphics card memory or above
- HDCP graphics card output (DVI or HDMI connection)
- HDCP display input (DMI or HDMI connection)

For BD creation

- BD recordable drive
