

VIDEOIMPRESSION

ArcSoft VideoImpression 2 is the perfect choice if you're a beginner who'd love to make home movies on your computer. The simple and intuitive user interface makes it easy to create awesome movies by combining video clips and still images along with neat transition effects and multiple audio clips. You can even capture video from your top-notch DV camera and save your movie as a VCD, which can be played on most DVD players!

- Combine still images and video files to create personalized home movies
- Make full-screen slide show presentations with photos, videos, and sound
- Include narration or a cool movie soundtrack – or both
- Add moving text for intro and ending credits
- Use cool transitions between each movie or slide show component

BURN TO CD, PLAY BACK ON DVD

Burn your movies directly to a CD to create a Video CD (VCD), then pop it into your DVD player. Watch your movies where they should be seen – on your TV! Don't forget to make multiple copies for your friends and family, too!

MOVIES AND SLIDE SHOWS, THE EASY WAY

VideoImpression is designed with beginners like you in mind. The easy-to-use "Storyboard" shows your project segment by segment. With drag-and-drop simplicity, you can create your movie or slide show in no time.

System Requirements:

- Windows 98SE/Me/2000/XP

AWESOME TRANSITIONS

This program goes beyond combining still images and videos. You can also add special-effect transitions between each clip so that segments blend into one another or scroll off the screen. Get rid of boring vacation and other home videos forever!

MULTIPLE SOUNDTRACKS

Add background music, narration, or both! Two separate tracks let you layer multiple audio components. Include a complete movie score, plus special effects and commentary. It's complete movie making made easy.

EDIT PHOTOS

Basic photo enhancing tools make your still images look their best for your movies and slide shows. Adjust image brightness and contrast by dragging independent sliders. So easy!

TRIM VIDEOS

Got a long video clip? Only want to use a small part of it? No problem. By simply dragging the "start" and "end" markers, you can trim video clips to play only the segment you want.

TEXT EFFECTS

Not only do you get to add text over any part of your movie, you also get to specify how the text appears and disappears. You can have it fade in and out, slide across the screen, rotate in and out, and much more. Try out all the effects!

MULTIPLE SAVE FORMATS

Save movies in a variety of formats and share them with virtually anyone. Playback your projects on virtually any DVD player or computer – both Windows and Macintosh. It's never been easier to make and share your movies or create fun slide show presentations.
