

ArcSoft TOTALMedia™

Turn your PC into the ultimate home entertainment center

- Schedule and record your favorite TV shows using an EPG and burn them to DVD
- Broadest DVB-T chipset support, including: DiBcom, Philips, EMPIA, Conexant, and Zarlink
- Capture and edit video with ease, and author your own DVD home movies
- Edit and enhance photos with ultra-simple controls; share photo slide shows with ease
- Build custom audio playlists, rip audio CDs and burn music discs
- Unicode support for broader file playback and display
- Works with mobile devices such as PocketPCs, Smartphones, and PMPs

ArcSoft TotalMedia™ is a powerful application that's been designed for ease-of-use. The program features simple navigation, big-button controls, and works as both a traditional PC application (2-foot experience) and a consumer-friendly program that can be controlled from across the room by remote control (10-foot experience). Pulling together the capabilities of DVD drives, TV tuners, card readers, and other removable devices, TotalMedia offers an all-in-one solution for photo editing and presenting, video/TV playback and recording, music playback and audio CD ripping/creation, and more.

TV

- Internet and Digital Electronic Programming Guide (EPG)
- Playback controls

MODULAR SOLUTIONS

TotalMedia is a totally modular application, fully customizable to meet your marketing, product, and client needs.

PORTABLE MEDIA DEVICE COMPATIBILITY

Extends beyond the desktop by exporting/importing video, photos, and music to/from your portable media players.

EXCELLENT RETURN ON INVESTMENT

TotalMedia's economical use of system requirements allows for deployment on a wide array of systems.

PERFECT FOR BUNDLING WITH ANY DEVICE

Works great as an add-on for digital cameras, DVD drives, PCs, notebooks, and any other media-centric hardware.

SYSTEM REQUIREMENTS

Windows 98SE/ME/2000/XP (Windows 2000/XP recommended) • P4 1.2Ghz or equivalent • 100 MB free hard disk space for program installation
256 MB RAM (512 MB DDR RAM recommended) • 16-bit color display at 800x600 (32 MB video memory with DirectX 3D support recommended)
DirectX 8.1 or above • Note: For time-shifting and MPEG-2 capturing, a Pentium 4 2.0 GHz processor (or higher) or equivalent is required.
